

## **What your colleagues say about Beats N' Bones .....**

*'2 of the best medical educators in EM! Great course.'*

*'Excellent course. Interesting and relevant blend of high yield cardiology and orthopedic topics.'*

*'This was a fantastic two-day overview of two big topics in ED practice, that married well together and allowed for interesting variety of teaching and reflection on my own practice.'*

*'Both speakers were fantastic and delivered material in an easy to follow, digestible, and evidence-informed way.'*

*'Dr Mattu is always outstanding. Everything is practical & useful.'*

*'Ortho very top notch! Would like more of this as I have less experience with Ortho.'*

*'Very effective use of case examples and alternating between topics that promoted engagement and critical thinking.'*

*'I really enjoyed the switching between two main themes; it kept my attention better than an entire day of ortho or an entire day of cardiology.'*

*'Fantastic high quality lectures with pearls that I can put into practice immediately.'*

*'Well organized, clinical pearls for my next shift.'*

*'Case-based learning supported with up to date research and clinical guidelines.'*

*'Great content - very practical and practice changing.'*

*'Everything was so relevant to my practice.'*

*'Appreciated going over cases and demonstrating very practically how one does a reduction of certain #s, etc.'*

*'A terrific reminder what great speakers and teachers Amal and Arun are!!'*

*'The two topics melded together very well!'*

*'I was surprised how engaging zoom learning can be. Worked well.'*

*'This was an excellent learning opportunity that challenged us to rethink many of the common presentations that we see in the ED, and enhance how we treat some of the 'simple' cases.'*

*'Great, high-yield course!'*

*'These two are the best teachers in their respective fields of expertise – so practical and useful and engaging!!'*

*'Quite interactive with the polls/Q&A. Very nice.'*

*'It was great. The mix was great. Both great teachers.'*

*'Outstanding - do more Beats & Bones!!!'*

*'Amazing course!! Highly recommended and time well spent!! Definitely practice-changing content!'*

*'Great course! Will recommend to my colleagues and definitely would consider taking a similar course on different topics again in the future.'*

*'Great course. Phenomenal pearls.'*

*'Excellent conference from 2 great lecturers.'*

*'Great two days of learning and review. Can't wait for the next one!'*

*'Beats N' Bones was great. I was engaged the whole time.'*

*'I really enjoy the option of online learning and its flexibility, especially with children in the house. Much easier to zoom in online instead of travel far and have to stay overnight.'*

*'Interactive cases and polls along with Q&A really help with engagement.'*

*'It is great to be able to attend conferences remotely and not have to travel far and give up more work days to attend.'*

*'I like the format and I like that we'll get the course recordings to review.'*

*'While online learning can be dry and un-engaging, both of these presenters are great educators so it was certainly interesting and engaging.'*

*'Very effective use of examples - whether x-ray or ECGs and how the conditions were discussed with multiple examples.'*

*'I was surprised (in a good way) by how many missed cases were presented. I am first five years of practice and still struggling to mentally transition from residency/exam mode (where there is right/wrong and black/white) to the real ambiguous (grey) world. Knowing that so many other doctors all across the world and different professions miss these things - but that these are things you can learn and improve - helps with my anxiety and imposter syndrome. Not the reason I signed up for the course but a pleasant unexpected surprise.'*

*'Very well organized, logical flow, good incorporation of cases.'*

*'Great use of poll questions kept us engaged.'*

*'Terrific incorporation of cases – highlighting clinical context and relation to everyday practice.'*

*'I really appreciated the time of day it was hosted to maximize participation for us west coast participants!!'*

*'It was enjoyable going back and forth from ortho to cardio topics. It allowed time to refocus.'*
